

Responsible investment chart

FDC SICAV Monétaire EUR - Actif 1

AXA Investment Managers (AXA IM) has implemented a disciplined, repeatable and consistent global fixed income investment process that allows to incorporate ESG dimensions at every step. Our responsible investment approach for FDC SICAV Monétaire EUR - Actif 1 is based on negative screening according to FDC exclusion recommendations and AXA IM responsible investment beliefs:

Negative screening

Removing ESG “tail risk” from the eligible investment universe, based on both FDC ban list and AXA IM’s responsible investment exclusion policy. We identify and exclude any issuer flagged as an “extreme” ESG risk.

To define the eligible investment universe, the portfolio construction process integrates ESG factors by excluding the riskier issuers based on ESG violations and controversial sector identification. All the exclusions required by the FDC will be integrated and completed with AXA IM’s exclusions policy, as detailed below:

- **Controversial weapons:** companies that use, store, trade controversial weapons (anti-personnel landmine, cluster bombs, depleted uranium) or their components.
- **Palm Oil:** companies that have not committed to achieve Roundtable on Sustainable Palm Oil (RSPO) certification or any other palm oil initiative. Companies that are involved in bad practices (unresolved land

rights conflicts, illegal logging, illegal operations, no social and environment impact assessments, no prior consulting stakeholders before operating)

- **Agricultural commodities derivatives:** we do not to participate into speculative transactions that may contribute to price inflation in soft commodities.
- **United Nations Global Compact principles (UNGC):** companies that have severe breaches of any of the ten UNGC principles.

Human rights

- Businesses should support and respect the protection of internationally proclaimed human rights; and
- make sure that they are not complicit in human rights abuses.

Labour

- Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining;
- the elimination of all forms of forced and compulsory labour;
- the effective abolition of child labour; and
- the elimination of discrimination in respect of employment and occupation.

Environment

- Businesses should support a precautionary approach to environmental challenges;
- undertake initiatives to promote greater environmental responsibility; and
- encourage the development and diffusion of environmentally friendly technologies.

Anti-Corruption

- Businesses should work against corruption in all its forms, including extortion and bribery.

- **Climate risk:** companies with strong revenue generation from coal mining or energy production, also taking into account coal investment plans, annual coal production, tar sand production and transportation.
- **Defense sector:** Companies considered as white phosphorus weapons manufacturers. A zero tolerance principle is applied to the controversial weapons such as landmines and cluster bombs.
- **Low ESG rated issuers:** companies with low ranking ESG scores based on our proprietary framework.

Governance

On a monthly basis AXA IM's RI team meets with portfolio managers in order to ensure that RI commitments and ambitions are respected. These meetings are also the occasion to empower them with ESG knowledge. This is achieved by:

- Monitoring ESG performance for all issuers.
- Assessing related ESG indicators, such as allegations, CO2 emissions, health and safety accidents.

In addition, the RI team interacts regularly with portfolio managers regarding issuers, new issues, sectors or key themes that impact securities in the portfolio. These meetings ensure that our investment strategies are in line with FDC requirements as well as AXA IM's ESG approach.
